INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU01/00137

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos :
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos : 1-12
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
The claims are not drafted in a manner that succinctly encompass one inventive concept. All 12 claims have been cast as independent claims, directed to different aspects of the described invention. Even then, the technical features that these claims define are not clearly evident. As such, it is unclear as to exactly what the features characterising the invention are, and exactly what the bounds of the monopoly sought are. Use of dependent claims instead of the rather numerous independent claims would be useful.
3. ☐ Claims Nos :
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Subsequent to Box 1 paragraph 2 above, the application could well be considered to be directed to 12 sets of different "special technical features". The application would therefore lack unity, and contravene **rule 40**.

This authority considers that there are no meaningful claims to search. None of the claims contain real technical integers. They appear to be mere statements of intent. 'ZIPFUND' is not recognisable as a technical integer, term or abbreviation. The specification does not shed any light on what it stands for. In particular, claim 1 is considered to be so broad and speculative as to include **outcomes of known** Electronic Funds Transfer (EFT) within its scope. Nevertheless, the search and report have been conducted as though claim 2 is dependent on claim 1. Although not entirely succinct, they are considered to possibly represent the broad concept, and considered **the main invention in accordance with rule 68.5**. *The documents subsequently cited are considered to be merely representative of prior art that fall within the scope of the application as the claims stand.*

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims: it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.
